

- 1. A method of identifying a T cell receptor (TCR) variable (V) gene expressed by target T cells in an individual, comprising:
- a) determining expression of one or more TCR V genes by activated T cells from said individual; and
 - b) determining regulatory activity elicited in response to one or more TCR V peptides by T cells from said individual;
- wherein a TCR V gene that is preferentially expressed in step a), whose corresponding TCR V peptide elicits low T cell regulatory activity in step b), is identified as a V gene expressed by target T cells.
- 15 2. The method of claim 1, wherein said individual has an autoimmune disease.
 - 3. The method of claim 2, wherein said autoimmune disease is multiple sclerosis.
- 4. The method of claim 1, wherein expression of said one or more TCR V genes is determined by the polymerase chain reaction (PCR).
 - 5. The method of claim 1, wherein said one or more TCR V genes are V beta genes.
- 25 6. The method of <u>claim 1</u>, wherein said activated T cells are characterized as CD25+CD4+ T cells.
 - 7. The method of claim 6, wherein said activated T cells are further characterized as CD45RO+ or CD45RA- T cells.

- 8. The method of <u>claim 1</u>, wherein preferential expression of a TCR V gene is indicated by at least a 50% higher expression of said V gene in activated T cells than in unselected T cells.
- 9. The method of claim 1, wherein said regulatory activity is secretion of an anti-inflammatory cytokine.
 - 10. The method of claim 9, wherein said antiinflammatory cytokine is IL-10.
- 11. The method of claim 9, wherein secretion of said cytokine is determined by an immunospot assay.
 - 12. The method of claim 1, wherein said one or more TCR V peptides are V beta peptides.
- 13. The method of claim 1, wherein said one or 15 more TCR V peptides are CDR2 peptides.
 - 14. The method of claim 1, wherein said low regulatory T cell activity in step b) is indicated by at least a 50% reduction in regulatory activity compared to a normal value.

- 15. A method of monitoring the efficacy of a therapy for an autoimmune disease, comprising:
- a) identifying a TCR V gene expressed by targetT cells in an individual with an autoimmune disease bythe method of claim 1; and
 - b) determining T cell regulatory activity elicited in response to the corresponding TCR V peptide after initiation of therapy.
- 16. The method of claim 15, wherein said autoimmune disease is multiple sclerosis.
 - 17. The method of claim 15, wherein said therapy selectively targets said T cells that express said TCR V gene.
- 18. The method of claim 17, wherein said therapy is immunization with a peptide corresponding to said TCR V gene.
 - 19. A method of monitoring the efficacy of a therapy for an autoimmune disease, comprising:
- a) identifying a TCR V gene expressed by target T cells in an individual with an autoimmune disease by the method of claim 1; and
- b) determining expression of said V gene by activated T cells from said individual after initiation 25 of therapy.
 - 20. The method of claim 19, wherein said autoimmune disease is multiple sclerosis.

20

- 21. The method of claim 19, wherein said therapy selectively targets said T cells that express said TCR V gene.
- 22. The method of claim 21, wherein said therapy is immunization with a peptide corresponding to said TCR V gene.
 - 23. A method of selecting a therapy for an autoimmune disease, comprising:
- a) identifying a TCR V gene expressed by target 10 T cells in an individual with an autoimmune disease by the method of claim 1; and
 - b) selecting a therapy that targets T cells expressing said TCR V gene.
- 24. The method of claim 23, wherein said 15 autoimmune disease is multiple sclerosis.
 - 25. The method of claim 21, wherein said therapy is immunization with a peptide corresponding to said TCR V gene.
 - 26. A kit, comprising:
 - a) one or more TCR V peptides; and
 - b) one or more agents for detecting TCR V gene expression,

wherein said kit components are suitable for use in the method of $\underline{\text{claim }}$ 1.

25 27. The kit of claim 26, wherein said one or more TCR V peptides are V beta peptides.

- 28. The kit of claim 26, wherein said one or more TCR V peptides are CDR2 peptides.
- 29. The kit of claim 26, wherein said one or more agents for detecting TCR V gene expression are PCR primers.
 - 30. The kit of claim 26, wherein said one or more agents for detecting TCR V gene expression are V beta PCR primers.
- 31. The kit of claim 26, comprising at least 3 TCR V peptides and at least 3 agents for detecting TCR V gene expression.
- 32. The kit of claim 31, comprising at least 20 TCR V peptides and at least 20 agents for detecting 15 TCR V gene expression.
